## 项目案例

1. Beijing, China	北京	Biogas	沼气	250kW *2
2. Inner Mongolia	内蒙古鄂尔多斯	Natural gas	天然气	400kW
3. Shanxi province	陕西铜川	Natural gas	天然气	50kW
4. Inner Mongolia	内蒙古	Natural gas	天然气	80kW
5. Ningxia province	宁夏	Biogas	CHP沼气热电联产	350kW*3
6. Henan province	河南漯河	Biogas	沼气	300kW
7. Shanxi province	山西临汾	Coal gas	煤层气	250kW*8
8. Jiangxi province	江西南昌	Biogas	沼气	200kW
9. Henan province	河南驻马店	Biogas	沼气	80kW
10. Gansu province	甘肃庆阳	Associated gas	伴生气	80kW
11. Serbia	塞尔维亚	Biogas	沼气	100kW *3
12. Inner Mongolia	内蒙古	Natural gas	天然气	150kW
13. Argentina	阿根廷	Natural gas	天然气	20kW
14. Sichuan Province	四川荣县	Natural gas CHP	天然气热电联产	500kW
15. Shandong Province	山东潍坊	Biogas CHP	沼气热电联产	400kW
16. Inner Mongolia	内蒙古	Natural gas	天然气	80kW
17. Sichuan Province	四川古蔺	Shale gas	页岩气	400kW*8

# BRIEF INTRODUCTION

## 公司简介

YDN POWER has been operating since 2000 and is now one of the most reputable companies in the field of gas power generation in China. We cover the entire value chain of gas generator set, including design, manufacturing, sales, installation, commissioning and service etc. Thanks to our professional team and modern facilities, we are able to provide reliable gas power solution in the range of 10-1200KW with both CNG, BIOGAS, LPG and other types of gas sources, which is significantly meaningful to energy-saving and environmental protection.

潍坊伊达能动力有限公司可追溯于2000年，是中国燃气发电领域最具影响力的企业之一。我公司可以提供全套的燃气发电机组服务包括设计、制造、销售、安装、调试以及售后服务。依靠强大的专业技术团队和现代化的生产设备，我们有能力提供性能可靠的的燃气发电机组，功率覆盖范围10—1200KW，燃料包括CNG，沼气，LPG和其他类型的可燃气体。燃气发电对于节能减排具有极其重要的意义。

# CERTIFICATION

## 质量认证

# MILESTONE

## 成长之路

- 1 • Gas generator set 燃气发电机组
- 2 • Gas generator set + CHP system 燃气发电机组 + 热电联产系统
- 3 • Gas generator set + Purification facilities 燃气发电机组 + 脱硫脱水装置
- 4 • Gas generator set + Synchronization & paralleling 燃气发电机组 + 并机 & 并网
- 5 • Turn-key project of gas power generation 燃气发电交钥匙工程
- 6 • To be discovered... 更多,敬请期待.....

# STRATEGIC PARTNERS

## 战略合作伙伴

# Natural gas power solution

Distributed energy is the energy supply and comprehensive utilization system, which is located near the end-user. Natural gas power generation is one of the most stable distributed energy supply solution. An excellent CCHP (Combined Cold, Heat and Power) system can increase the efficiency of natural gas power generation up to 95% and above.

Developing distributed natural gas power generation system is an inevitable option to realize energy saving, emission reduction and sustainable development of energy supply. It can realize energy saving, emission reduction, improving the safety of energy supply, peak shaving and valley filling for power and gas supply, and promoting the development of circular economy etc. It's an irreversible trend in the development of modern energy resources.

## 分布式天然气发电方案

分布式天然气发电方案分布式能源是分布在用户端的供能及能源综合利用系统。天然气发电是最稳定的分布式供能方式之一，优秀的冷热电三联供发电系统能够把天然气发电的有效率提高到95%以上。发展分布式天然气发电系统是实现节能减排和能源供应可持续发展的必由之路，具有节能、减排、提高供能安全性、电力与天然气供应削峰填谷、及促进循环经济发展等众多的优势，是现代能源领域发展的不可逆转的潮流。

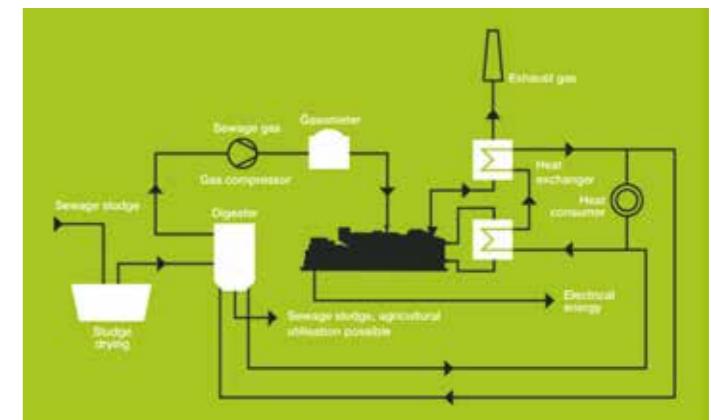

# Biogas power solution

Biogas Electricity Generation is a technology to use biogas with the development of large scale biogas project and comprehensive utility of biogas. Organic waste such as grain stalks, human and livestock manure, rubbish, mud, municipal solid waste and industrial organic waste water can produce under anaerobic conditions. If biogas is used to generate electricity, not only environmental problem in biogas project is solved, but greenhouse gas release is also reduced. Wasted is transformed into treasure, huge heat and electricity are also produced. This is a good idea for environmental production and energy recycling. At the same time, there is also remarkable economic benefit.

## 沼气发电方案

沼气发电随着大型沼气池建设和沼气综合利用的不断发展而出现的一项沼气利用技术。有机物质（如作物秸秆、人畜粪便、垃圾、泥污、城市生活垃圾及工业有机废水等）在厌氧条件下，通过微生物的分解代谢产生沼气。将沼气用于发动机，不仅解决了沼气工程中的环境问题，减少温室气体排放，而且变废为宝，产生了大量热能和电能，符合能源再循环利用的环保理念，同时带来可观的经济利益。

Requirements for biogas
1. Methane should be at least 55% 2. The biogas temperature should be between 0–60 °C 3. No impurity should be in the gas. Water in the gas should be less than 20g/Nm³. 4. Heat value should be at least 5500kcal/m³, if less than this value, the power of the engine will be declined. 5. Gas pressure should be 3–100KPa, if the pressure is less than 3KPa, booster fan is necessary. 6. The gas should be dehydrated and desulfurized. Make sure that there is no liquid in the gas. H₂S < 200mg/Nm³
Requirements for natural gas
1. Methane should be at least 95% 2. The natural gas temperature should be between 0–60 °C 3. No impurity should be in the gas. Water in the gas should be less than 20g/Nm³. 4. Heat value should be at least 8500kcal/m³, if less than this value, the power of the engine will be declined. 5. Gas pressure should be 3–100KPa, if the pressure is less than 3KPa, booster fan is necessary. 6. The gas should be dehydrated and desulfurized. Make sure that there is no liquid in the gas. H₂S < 200mg/Nm³
沼气发动机对沼气的要求：
1、甲烷含量不低于55%， 2、燃气温度不得低于0℃，不得高于60℃ 3、燃气不含其它杂质（杂质粒度应小于5μm）。水含量不得高于20g/Nm³ 4、燃气热值≥5500kcal/m³，若燃用低热值燃气（热值<5500kcal/l），机组功率略微下降。 5、燃气进气压力3-100KPa；低于3KPa需增加燃气增压装置，高于100KPA需要减压装置 6、燃气必须经过脱硫、脱水处理。硫化氢 < 200mg/Nm³

# GAS GENERATOR SET

## 燃气发电机组

Requirements for biogas:

### 对沼气的要求

- (1) The methane content should not be lower than 55%.
- (2) The Biogas temperature should be between 0–60°C.
- (3) No impurity should be in the gas. Water in the gas should be less than 20g/Nm<sup>3</sup>.
- (4) Heat value should be at least 5500kcal/m<sup>3</sup>, if less than this value, the power of the engine will be declined.
- (5) Gas pressure should be 3–100KPa, if the pressure is less than 3KPa, booster fan is necessary.
- (6) The gas should be dehydrated and desulfurized. Make sure that there is no liquid in the gas.  
H<sub>2</sub>S < 200mg/Nm<sup>3</sup>.

Requirements for Natural gas:

### 对天然气的要求

- (1) The methane content should not be lower than 95%.
- (2) The natural gas temperature should be between 0–60°C.
- (3) No impurity should be in the gas. Water in the gas should be less than 20g/Nm<sup>3</sup>.
- (4) Heat value should be at least 8500kcal/m<sup>3</sup>, if less than this value, the power of the engine will be declined.
- (5) Gas pressure should be 3–100KPa, if the pressure is less than 3KPa, booster fan is necessary.
- (6) The gas should be dehydrated and desulfurized. Make sure that there is no liquid in the gas.  
H<sub>2</sub>S < 200mg/Nm<sup>3</sup>.

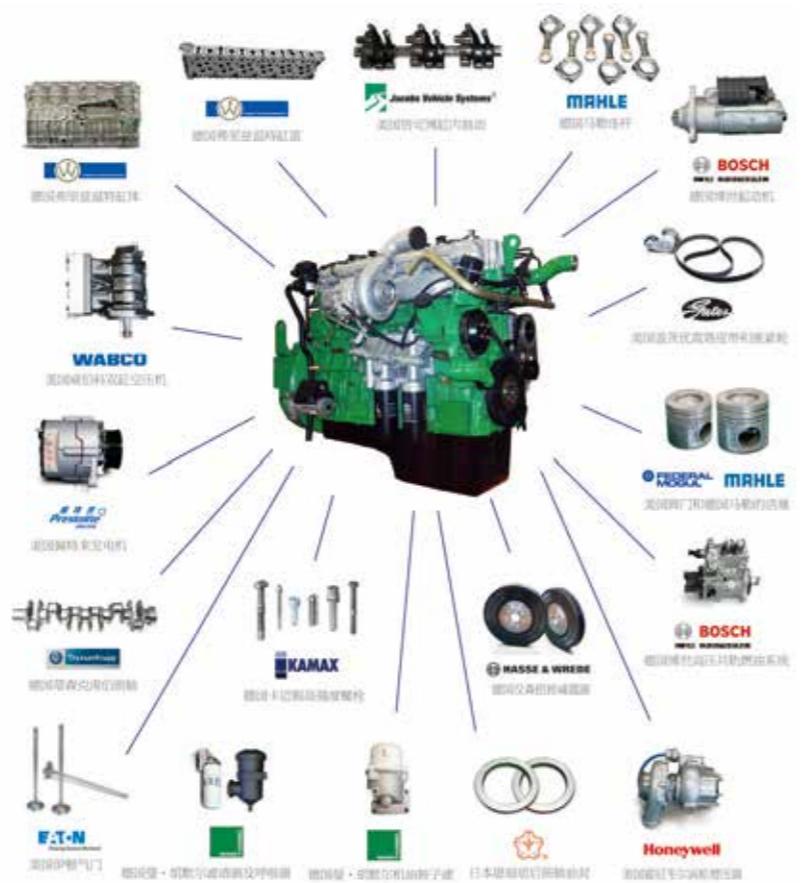

Key Parameters of Cummins Gas Generator Set 参数表

Model	YDNC-250	YDNC-300	YDNC-500
Rated power (kW/KVA)	250/312.5	300/375	500/600
Rated current (A)	450	540	900
Rated Voltage (V)			230/400
Rated Frequency (Hz)			50/60
Dimension (mm)	3400*1400*2000	3800*1780*2080	5100*2500*2200
Weight (kg)	2930	3800	6500
Engine	Model	GNT855	GTA19-G2
	Type	Water-cooled, 4-stroke, in-line	Water-cooled, 4-stroke, V shape
	Rated Power(kW/KVA)	300	360
	Rated Speed(rpm)		1500/1800
	Cylinder No.	6	6
	Bore*Stroke(mm)	140 × 152	159 × 159
	Cooling Method		Water-cooled
	Oil Consumption(g/KWH)	<1	<1
	Biogas Consumption(m <sup>3</sup> /h)	150	180
	Natural gas Consumption(m <sup>3</sup> /h)	75	90
Alternator	Starting method		24V DC
	Brand		Farrand
	Model	FLD250	FLD300
	Rated Power(kW/KVA)	250/312.5	300/375
	Voltage Regulation		≤±1
Control System	Excitation mode		Brushless, Self Excitation
	Insulation Class		H
	Model		SMARTGEN HGM6110N
	Working Voltage		DC8.0V to DC35.0V
	Overall Dimensions		197 mm x 152 mm x 47mm
	Panel Cutout		186mm x 141mm
	Working Condition		Temperature: (-25~70)°C; Humidity: (20~90)%
Generator	Weight		0.56kg

**LOVOL**

# DIESEL GENERATOR SET

## 柴油发电机组

Lovol engine has the features of compact structure, low noise, low fuel consumption and high performance price ratio. It is the first choice of small power range gen-sets. They are widely used in areas such as telecommunication, railway, outdoor projects, mining, rescuing. Lovol 1003, 1004 and 1006 series engines are manufactured by Lovol Tianjin Engines Co.,Ltd.

雷沃系列发电机组选用雷沃动力发动机，其结构紧凑、噪音低、油耗低及性价比高，为小功率段发电机组的首选。机组广泛应用于通讯、铁路、户外工程、矿山、抢险等领域。雷沃动力 1003、1004 及 1006 系列柴油发动机由天津雷沃发动机有限公司生产。

## 柴油发电机组

Cummins diesel generator sets select Cummins B, C, L, N, K series engines, which are produced in accordance with Cummins global quality standards with advantages of wide power ranges, low emission and low fuel consumption. The global service network of Cummins can provide our customers with easy reliable services.

康明斯系列柴油发电机组是选用康明斯B、C、L、N、K系列发动机配套的柴油发电机组，该系列产品以康明斯全球统一的质量标准生产，具有功率覆盖广、排放低、消耗低等优点。康明斯公司全球服务网，为客户提供可以信赖的服务保障。

# GAS ENGINE CONTROL SYSTEM

## 燃气发动机控制系统

### System description 系统说明

The system integrates the functions of ignition control, gas control and speed regulation control of the engine. It can replace the traditional general ignition system, gas supply system and electronic speed control system. It avoids the cumbersome installation of the two systems and the defects that the two systems cannot work in coordination, so that the whole engine works more stably and has better performance.

系统集成了发动机的点火控制、燃气控制和调速控制功能于一体，可以替代传统的通用点火系统、供气系统和电子调速系统，避免了安装两套系统的繁琐和两套系统不能协调工作的缺陷，使整个发动机工作更稳定，性能更优越。

### System features 系统特点

- ◆ Integrated control, the ignition, air supply and speed regulation of the engine are regulated uniformly, and the unit works stably and has excellent performance
- ◆ Independent ignition coil, high energy sequential ignition, intelligent adjustment of ignition angle according to speed and load
- ◆ IMPCO proportional mixer, stable performance
- ◆ Intelligent adjustment of gas pressure can realize lean combustion control of engine
- ◆ Full closed loop speed control
- ◆ The hand-held debugging instrument is convenient for debugging and maintenance
- ◆ It is suitable for supercharged and non supercharged engines
- ◆ High cost performance, reliable components and low maintenance cost
- ◆ Scope of application: Suitable for CNG, LPG, LNG and other fuels, and can be applied to 4-cylinder and 6-cylinder marine engines

◆ 集成式控制，将发动机的点火、供气和调速进行统一调节，机组工作稳定、性能优异

◆ 独立点火线圈，高能顺序点火，可根据转速和负荷进行点火角智能调节

◆ IMPCO比例式混合器，性能稳定

◆ 燃气压力智能调节，可实现发动机稀燃控制

◆ 全程闭环调速控制

◆ 手持式调试仪，方便调试和维护

◆ 适用于增压和非增压发动机

◆ 产品性价比高，部件性能可靠，维护费用低

适用范围

◆ 系统适应于CNG、LPG、LNG等多种燃料，可以应用于4缸、6缸船用发动机

# Genset Control System

## 机组控制系统

### Automatic/manual control 自动/手动控制

- ★ RS485 communication port enable remote control, remote measuring, remote communication via ModBus protocol.
- ★ Protective functions: under/over speed, starting failure, low oil pressure, high water temperature, high oil temperature, over current.
- ★ Genset parallel with Genset, single genet parallel in grid, multiple gensets parallel with grid.
- ★ Connect, monitor and control the generator via 4G wireless network.
- ★ Automatic Transfer switch can start the generator automatically when the main power fails and transfer the load from the main power to the generator automatically.
- ★ The synchronization cabinet / parallel cabinet has functions like automatic start-up of generator set, automatic synchronization, automatic parallel operation, automatic distribution of active power according to ratio, automatic increase / disconnection standby shutdown, generator fault display and protection.
- ★ 具有RS485通讯接口，利用MODBUS协议可以实现“三遥”功能；
- ★ 保护功能：低/超速、启动失败、低油压、高水温、高油温、过流保护
- ★ 机组与机组并联，单机并网模式，多机并网模式
- ★ 可通过4G无线网络将机组连接到因特网，实现机组的远程监控
- ★ 自动切换开关，可以在市电异常的情况下，自动启动机组并将负载自动切换至发电机组，由发电机组给负载供电。
- ★ 并网柜/并机柜具有自动启动发电机组、自动同期、自动并机、自动按比率分配有功功率、自动增机/解列待机停机及发电机故障显示、保护等多种功能。

# SOUND-PROOF SOLUTION

## 静音方案

Sound-proof canopy could be customizable according to exact requirements from customers. Advanced noise reduction technology and qualified sound absorbing material applied to make sure all your sound-proof standard could be successfully met.

静音箱可按照客户的每项具体要求进行定制。先进静音技术和优质吸音材料的应用，确保客户的全部静音标准完美实现。

★ 68dB(A)/7m could be done for super silent solution

超静音方案可实现7米处噪音低至68分贝

★ Integrated design of base frame, battery and muffler is convenient for delivery and installation

底座、蓄电池和消音器一体式设计，便捷运输和安装

# CHP SYSTEM

## 热电联产

Water obtains heat from needle tubing when it goes through the recovery devices of exhaust. This needle tubing fixed at the recovery device can conduct the heat. In such way, the temperature of water will reach 50–90°C, or water will be changed into saturated steam in certain pressure. Under normal circumstance, the heat of exhaust will take 32% of total heat. The thermal efficiency will be improved by 20–30% thanks to CHP system.

机组尾气通过尾气回收装置中的导热针管，把热量传导给流过余热回收设备中的水，从而实现对水加热达到50–90°C或是一定压力下的饱和水蒸气，实现尾气利用。额定工况下排烟热量占燃气总热量的32%，利用烟气余热可以提高燃气热能利用率20–30%。
